

Expert Agent Field Specification

The format should match the xml format (please see the link from the API documentation page).

NOTE

The one exception will be in the organisation of the properties where the xml format has multiple <property> tags but the JSON format will contain a parent “properties” element consisting of an array of properties.

i.e.

```
{
  "properties": [
    {
      <property_1_detail>
    },
    {
      <property_2_detail>
    }
  ]
}
```

Example Output

The following example output shows how the structure of the file is exported.

```
{
  "properties": [
    {
      "reference": "DMDON_000023",
      "department": "Residential Lettings",
      "propertyofweek": "NO",
